The HPG Difference

Since 2002, we have combined hands-on EHR technology expertise with deep healthcare knowledge. We take time to understand your desired results first, then we plan and implement the processes, tools and resources needed for your success. We customize plans and builds, detect potential conflicts, and provide proactive solutions for a seamless experience from start to finish. At every level, we engage with personalized attention to deliver stronger performance across your enterprise.

We are recognized by our customers, associates and partners as the premier provider of HIT services.

The HPG Team

Our team includes nurses and clinicians, pharmacy experts, lab technicians, radiology experts, certified revenue cycle professionals, medical executives, program and project managers, and many others. These specialized clinical and operational backgrounds, combined with an average of 17+ years of HIT experience per consultant, mean we deliver the expertise our customers expect and deserve from a trusted partner.

Here's what our Customers have to say about working with HPG:

"HPG builds a partnership with us — we're not just clients and vendors. They have deep relationships with their customers and are highly accountable. They go the extra mile."

Linda Thompson-Carter,
Director, Clinical Information Solutions
Adventist HealthCare, Gaithersburg, Maryland

Through our network of 100+ consultants working with thousands of EHR users across the country, you can rest assured we stay up to date on the latest trends.

We take a collaborative approach and use well-defined, evidence-based methodologies. Our project planning factors in your health system's "big picture" business needs, as well as the needs of your clinicians, community partners and patients. We personalize your account strategy to support your organization's goals through the power of EHR technology.

We deliver expert solutions to drive stronger performance and better outcomes.

Connect with us today.

One call to us - that's all it takes for your Cerner or Epic implementation, expansion and optimization needs. Why spend time and money integrating multiple vendors when you can achieve a better result with just one partner? HPG is the single-source expert you can trust for greater flexibility, scalability, service and efficiency.
