

Integrate. Optimize. Perform.

Our Epic Services

Our hands-on HIT consulting and advisory services provide effective implementation and support of Epic technology — delivering stronger performance, creating greater efficiency, improving financial health, and enhancing patient safety and health outcomes.

Support includes all Epic modules related to patient care such as registration, scheduling and managing health data; clinical systems for physicians and other providers; systems for lab technologists, pharmacists and radiologists; and coding and billing for insurers.

Our dedicated Epic consultant fulfills key roles on your EHR projects through every phase of implementation and beyond:

- Certified Consultants
- Project/Team Leaders
- Conversion/Interface Leaders
- BI and Data Analytics
- Bridges Interface Analyst
- Application Testing and Script Development
- Pre-Go-Live Training and Go-Live Support
- Data Migration
- Support Service Desk

Supporting Your EHR Implementation and Optimization Needs

With robust EHR technology solutions as your foundation and HPG as your partner, we propel your health system's initiatives forward to achieve your objective of the best possible patient care.
